Pnsmile Venture (Remote)

Abuja, Nigeria (2023 – Present)

- Led end-to-end development of company products from UI/UX design to live deployment.
- Designed and built the full Pnsmile Venture web platform, handling wireframes, component architecture, frontend development, testing, and deployment.
- Developed responsive web applications improving user experience and engagement by over 35%.
- Optimized frontend performance, reducing page load time by 15%.
- Integrated third-party APIs and ensured secure, scalable UI patterns.
- Maintained brand consistency and accessibility across all products.

Frontend Engineer (Fintech – B2E Platform)
Tilak Investment Pty South Africa (Remote)
GoPay B2E Application (Project-Based)

2021-2023

- Built frontend interfaces for a fintech B2E payment platform focused on business users.

- Implemented secure and intuitive dashboards for transactions, balances, and workflows.
- Collaborated closely with product and backend teams to align UI with financial logic.
- Focused on usability, clarity, and performance in high-trust financial environments.

ReactJs Developer

Tilak Investment Ltd (Hybrid)

South Africa (2018 – 2020)

- Led frontend development for an e-commerce platform.
- Built visually appealing, responsive interfaces using React, Tailwind , and JavaScript.
- Improved checkout flow and overall performance.
- Researched emerging technologies to improve product quality.

Frontend Developer (Hybrid)

Pan Africa Centre for Entrepreneurship

(2015 – 2017)

- Implemented UI/UX best practices to improve navigation and user satisfaction.
- Built interactive interfaces using HTML, CSS, and JavaScript, increasing engagement by 20%.
- Conducted A/B testing and optimized layouts based on analytics and user feedback.
- Collaborated with cross-functional teams and used Git for version control.

(Previous work experince (Data Analyst, Product Manager, Administrative Manager)

PROJECTS

Pnsmile Venture Platform

- Full product ownership: UI/UX design, frontend development, testing, and deployment.
- Built reusable React components and responsive layouts using Tailwind CSS.
- Ensured performance optimization, SEO readiness, and accessibility compliance.

GoPay B2E Fintech Application

- Frontend development for a business-to-employee fintech payment solution.
- Designed dashboards and workflows supporting financial transactions and reporting.

Resida Property Search Platform (Co- Proejct)

- Built responsive frontend using React, TypeScript, Tailwind CSS, and Figma.
- Focused on UX optimization, performance, and intuitive navigation.

Resida Property Search Project

Resida Project is an innovative mobile app designed to simplify the search for accommodation in bustling urban environments like Lagos, where demand far exceeds supply. It offers a unified, intuitive platform with a comprehensive database of verified properties, direct connectivity with agents or homeowners, and personalized search functionality. Utilizing Figma, React, TypeScript, CSS, JavaScript, GitHub, Vercel, and Click-up, Resida transforms the apartment-hunting process into a seamless, transparent, and user-centric experience, saving time and reducing stress for users while empowering them to make informed decisions.
